

What actually went right last week

*The 5 stories readers chose, week of
28 September*

Zoom out: In 1990, 71 of every 100 people
had electricity at home. In 2023 it was 92.
(World Bank)

The global greater one-horned rhino population has reached 4,075, with Kaziranga National Park in Assam now sheltering more than 2,600 of them after rhino killings there fell 86% since 2016.

What it proves: Coordinated anti-poaching investment, drones and forest camps included, can bring a once-declining megafauna population back to record highs.

87

After tens of thousands protested her eviction, 87-year-old Maricarmen Abascal will return to her Madrid apartment under a new lease at roughly 500 euros a month.

What it proves: A sustained public protest in Madrid can reverse a completed eviction and restore a tenant's home on comparable terms.

5.3%

Brazil's unemployment rate fell to 5.3% for the quarter ending in August, the lowest for that period since records began in 2012, with 103.5 million people employed.

What it proves: Brazil's 774,000 new jobs in three months shows a large economy can add formal employment at a record pace.

A SpaceX Dragon capsule carrying four astronauts docked with the ISS in 7 hours 55 minutes, the fastest crewed arrival in the station's history.

What it proves: A crew and capsule combination demonstrates astronauts can now reach the ISS in under eight hours instead of the usual day or more.

Several bystanders in Wohlen, Switzerland pulled all four young occupants from a burning Fiat Punto after it crashed into a tree, some of the rescuers suffering burns themselves.

What it proves: Ordinary bystanders without equipment or training can save four lives from a burning car before emergency crews arrive.

All five stories are linked in the post text above.

“Progress is impossible without change, and those who cannot change their minds cannot change anything.”

George Bernard Shaw
