GOOD NEWS WEEKLY

What actually went right last week

The 5 stories readers chose, week of 12 October

Zoom out: Since 1990, Europe has cut its greenhouse gas emissions by 37%. Over the same years its economy grew by 68%. (European Environment Agency)

$114 million

The world's largest wildlife crossing, a $114 million bridge over ten lanes of California's Highway 101, is set to open December 2, giving inbred Santa Monica Mountains lions a path to mates beyond the freeway.

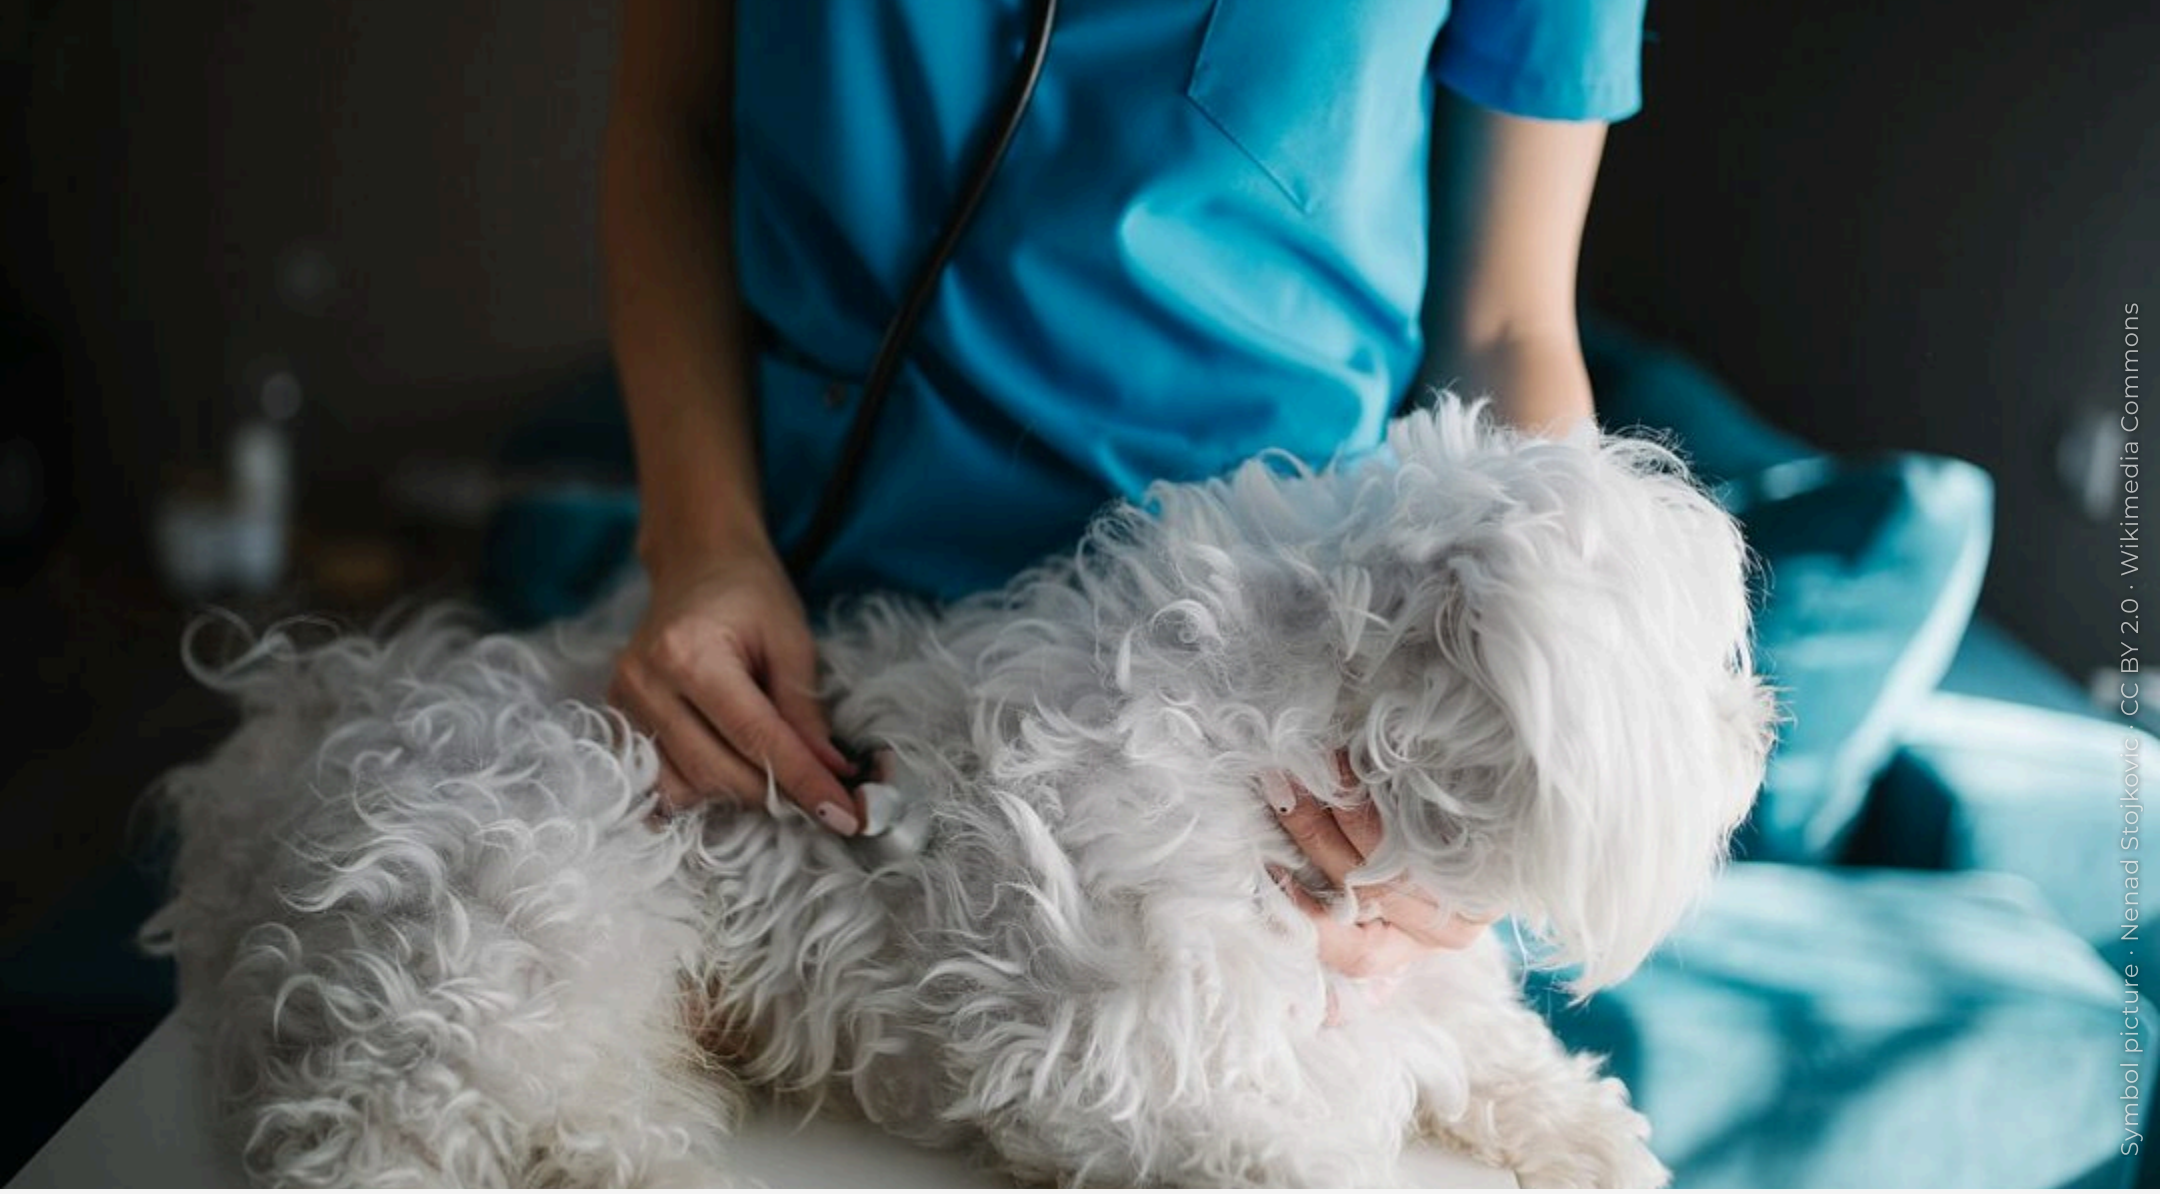

What it proves: Wildlife officials expect kittens born this year to a Simi Hills lion named P-113 to be among the first to use the bridge.

Payton Obert turned a childhood lemonade stand she started at age 8 into a charity network that has now raised $5 million for children facing illness and hardship across eight years.

What it proves: A single child's fundraiser can grow into a registered nonprofit with stands running across six US states.

Vasi, a sloth bear rescued by Wildlife SOS in India after a snare trap cost him a leg, became the first bear in the world fitted with a prosthetic paw in September 2025.

What it proves: Custom animal prosthetics already used on horses and birds can now restore a bear's ability to walk.

Arizona teen Jordan Hope gave the sneakers off his own feet to a struggling elderly stranger outside a Maricopa Walgreens, and the friendship that followed has raised more than $15,000 for the man.

What it proves: A single act of kindness, once shared online, can draw more than $15,000 in community support for one person.

32

All 32 patients in the NEOPRISM-CRC trial stayed free of bowel cancer recurrence for 33 months after a nine week course of pembrolizumab before surgery, far beating the 25% relapse rate expected with standard chemotherapy.

What it proves: Blood tests tracking tumor DNA could let doctors identify which patients can safely skip extra chemotherapy after surgery.

All five stories are linked in the post text above.

“What you do makes a difference, and you have to decide what kind of difference you want to make.”
